

Zeacom extends direct channel support to Queensland

Sydney, 9 June 2010 – Unified Communications vendor Zeacom has appointed Tristram Morgan as Channel Manager for Queensland, a newly established position responsible for supporting all partners statewide. Tristram will provide additional pre-sales, product training and business development support directly to channel partners and champion the needs of Queensland customers within Zeacom.

Tristram has over 12 years of telecommunications and Unified Communications experience, in contact centre and corporate environments. Prior to joining Zeacom, Tristram was an account manager at Macquarie Telecom and has also worked for AAPT and Nokia.

Stephen Sarjeant, Australian Country Manager, says the new position is an opportunity to grow marketshare in Queensland. "Our objective is to build deeper relationships with our partners and customers in Queensland and Tristram's industry background combined with his skills in training, sales and key account management will help partners who want to better leverage our solutions and brand."
